

1/10-scale Xcelorin Brushless Electronic Speed Control (Sensored and Sensorless)

Wiring (connection) diagram for the 1/10 Xcelorin Electronic Speed Control (ESC). With the pin and connector side of the ESC facing you:

- Switch connector should be plugged in to position 1 thru 3.
- Receiver connector in position 4 thru 6.
- Cooling fan connected using pins 7 and 8.

Pin Positions:

On / Off Switch	Receiver Wire	Fan
1 – Red	4 – Brown	7 – Black
2 – Orange	5 – Red	8 - Red
3 - Brown	6 - Orange	

Note:

It is important to remember that when the connectors are plugged in properly the gold tabs will be facing away from the ESC as shown above.
